2023-2024 CUHSD Annual Student Data Request

As always, thank you for your assistance with this on previous years, it is of utmost importance, and very appreciated. This year we are requesting this same data, and this document has the intention of facilitation or refreshing the process to do so.

Please remember that for all data extracts, the most important thing we need to have is the **Student's State Id**, it's the only way we can match and add data to our system. In order to streamline the process, we have attached a template file to this email. We kindly ask that you fill in the required information for each student as accurately and comprehensively as possible. The template covers general student details such as Demographics, available English and Testing Information, Migrant and 504.

You can access our data template using this link:

FEEDER SCHOOLS DATA REQUEST

The current information has the intention of providing as much resources to our feeder schools in order to make it easier to gather the incoming freshmen data we request each year to optimize the enrollment process in our High Schools. We appreciate your responses, time and effort, and we want to assist you as much as possible.

Because not all of us use the same Student Information System (SIS), we understand the process to gather the data is not the same and in some cases it might be more complicated than others, please let me know if I can assist you in any way.
